

Our New RexLighting App provides feature packed advanced lighting control

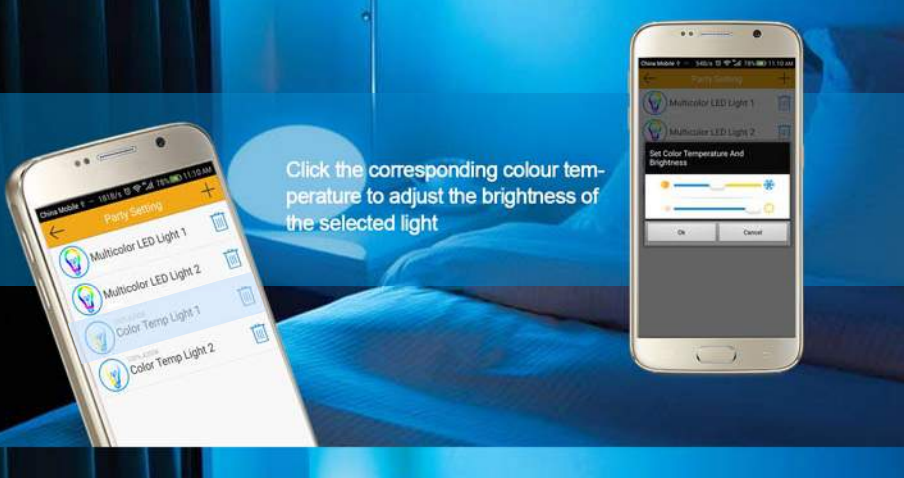

Our RexLighting App utilizes high technology to provide stable, multi function wireless control of a wide range of LED bulbs

The RexLighting APP provides you with remote, finger tip access, to the latest technological advancements in lighting control. With our app you may adjust the light temperature, or even install bulbs which are capable of providing a variety of selectable colors. From setting the mood for any occasion to achieving the highest levels of energy efficiency, the RexLighting App does it all in a secure and reliable manner.

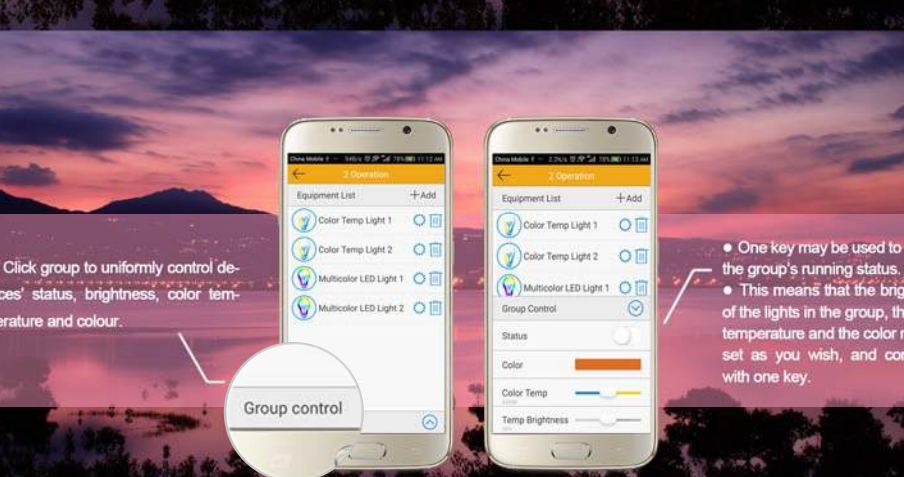

Operational Scenarios

With the RexLighting App you may create customized lighting scenarios to meet your specific needs for any time during the day or night. This may include a variety of lighting modes including a dining mode, reading mode, working mode, cinema mode, or sleeping mode.

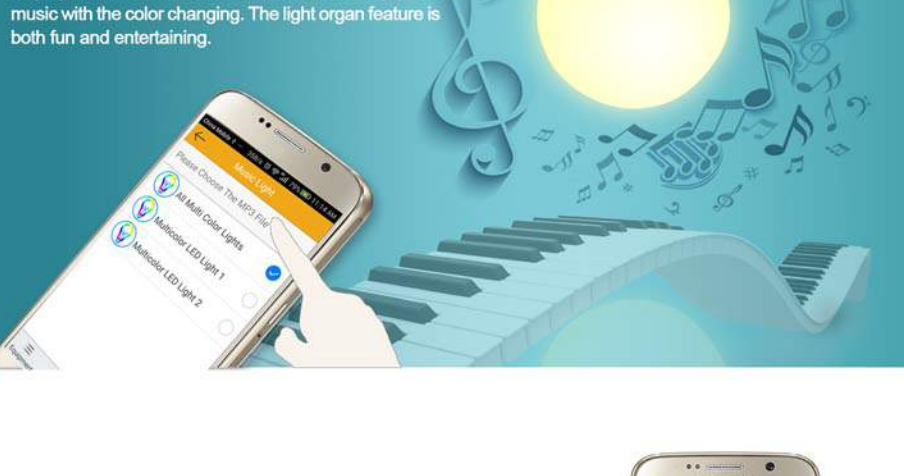

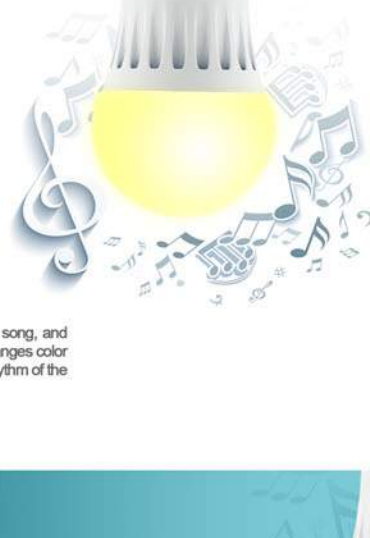

Groups

The RexLighting App also allows the customer to create and control groups of lights for outstanding lighting effect uniformity.

Music Light

Simply play your favorite song, and watch as your lighting changes color and frequency with the rhythm of the music.

Timer Capable

The RexLighting App also allows you to turn on or off any lights in your network at pre set times. This may be used very effectively for everything from security, to convenience lighting, to being part of your energy saving strategy.
